

Leave XM radio alone. I drive alot of miles to and from work every day and XM radio is my choice of station to listen to. Weather and traffic information should not be controlled by lobbyists or broadcasters. For broadcasters to try to limit what XM radio can broadcast should not happen in a free society(although I slowly feel us losing our freedoms). Leave XM radio ALONE and worry about more important problems in our country. Don't let money contributions cloud your judgement as to what a free America means. Thanks
